I liked how Ms Serena encouraged us to think from the children's perspective. This gave me the opportunity to relate to them better. I appreciate how Ms Serena doesn't restrict us to just solely use one method of teaching. Instead, she demonstrated various examples based on her personal experiences. There are also hands on materials to keep us engaged, and to trial and error with, so that we understand how the speech sounds are applied. Thank you Ms Serena for being so encouraging and building on our knowledge instead of "correcting" us! I look forward to applying what I've learnt in class!"

I learnt ways to teach phonics in a more systematic approach and the different ways to ask questions with the children. The 1st box and the 2nd box method is very clear.

There were a lot of AHA! moments when some of the things finally made sense. Like how multiple combinations of different letters produce the same sound.

The resources prepared were very impressive - it looks simple but it is so powerful as an aid to enhance our literacy understanding. All in all, I think it's a workshop worth attending whether you're a parent or a teacher or just someone that is keen to know more about how important letters and speech sounds are for children's literacy development.

I really liked the workshop, especially the hands-on part.

Very enriching and eye opening workshop suitable for teachers or even parents who wish to clarify their doubts about phonics. I also learnt tips on how I can carry out phonics activities and how I can make adjustments in activities to cater to children with different learning needs.
